

Hybrid
GenChair™
www.genchair.com

The hybrid rollator/transporter combines a dual walker assist and transporting function in one ergonomically designed unit, and incorporates numerous features:

- Better independence and ambulation through improved platform stability
- Super light construction (under 19 lbs.). Rated up to 250 lbs.
- Comfortable and adjustable foot rest in transport mode. Foldable/removable in rollator/walker mode
- Soft, comfortable backrest. Can be switched for rollator or transport mode, and folds for easy storage
- Improved safety through brake and lock system for movement control
- Height adjustable armrests (optional), handles and brake control
- Extra large and comfortable seat
- One-step, foldable chair assembly for easy storage
- Built-in storage basket
- Life-time limited warranty
- ISO tested, FDA registered, and Medicare approved

Patent Pending: US60/813,011

The desire for ergonomic and safe performance to both the patient and care-giver were the driving force behind this new PCA Technologies' design.

Our *GenChair™* incorporates a wide range of uses, including rehab centers, doctors offices, hospitals, homes, and recreational activities.

Manufactured for, and Distributed by:

PCA Technologies, Inc., Port St. Lucie, FL, 34952; TF-USA: 888-893-4557
